

Airwall Repair/Routine Maintenance

I. Summary

- Repair all airwalls mechanically and aesthetically
- Routine maintenance of airwalls

II. Needs/Problems

- Many airwalls have issues rolling on the tracks
- The extenders on the bottoms of several airwall panels do not extend correctly
- The extenders on several airwall panels have issues closing completely against a bisecting airwall panel.
- Some airwall closet doors have broking turn knobs.
- Many extenders on the airwall panels have torn gaskets/seals.
- The fabric on the outside of the seals are torn.
- The stop block in the airwall track diving the room in half needs to be moved back into place.

III. Expectation

- Fixed all panels and doors to provide efficient functionality
- Provide the routine maintenance – lubing, adjustments.
