NARRATIVE SUMMARY OF MODIFICATIONS

The following is a general description of the modifications included in this addendum. The provided list may or may not include all modifications which have been made. The Contractor is advised to make their own review of the Construction Documents to determine all potential impacts to the Contract Price. The Scope of Work presented by the Construction Drawings and Specifications included herein shall be considered included in the submitted bid price.

1. Storm sewer along north side of site has been changed from RCB to dual pipe HDPP per Owner/CM guidance (RFI 037).
2. Telecommunication box locations have been moved to islands per Owner/CM request (RFI 048).
3. Limits of light and heavy duty paving have been modified per Owner/CM request (RFI 049).
4. Service drive has been added at southwest corner of site per Owner/CM request (RFI 049).
5. Location of domestic water meter vault has been modified to clear new service drive (RFI 049).
6. Domestic meter vault has been adjusted and is now served off of 12-in TPWA water line instead of 8-in fire line (RFI 061).

7. A new 2-in private domestic water line has been extended from the 6-in private domestic line that serves the casino, to the maintenance building (RFI 061).
8. An oil-water separator has been added to the storm sewer line which serves the inlet at the bottom of the southeast dock (RFI 054).
