

WATER JETTERS

RESTORE DRAINS TO FREE-FLOWING CAPACITY

RIDGID® water jetters fully clear grease and soft blockage obstructions in both residential and commercial applications. Available in both electric and gas models, these machines propel a flexible hose through drain lines to blast through sludge, soap, and grease blockages with 1350 to 3000 psi. As you pull the hose back, it scrubs the line, flushing debris away and restoring drains to their free-flowing capacity.
