

Scope of Work

Tahlequah 4th Street Pavilion

1. The canopy will be without side walls.
2. Materials will consist of metal roofing, fascia, and ridge cap with approved roofing fasteners. Frame work will be red iron.
3. Remove existing 8x8 entrance covering.
4. Set poles accordingly and install new covering to the East side of the building entrance matching the existing roof line approximately 30' from the building with 50' rake.
5. Existing metal fascia may be removed and reused on the new covering.
6. New roof metal must match the existing with a continuous roof line from the building.
7. A gutter will need to be added to the new structure to flow back to the existing downspout. A new gutter and downspout will need to be added to the shorter side of the rake.
8. The new roofing and any new trim will need to be painted to match the existing building. (Paint color or colors will be given to the awarded bidder).
9. Vendor will supply all labor, materials and debris removal from property.
