REQUEST FOR PROPOSAL

Independent Audits for Air Monitoring Sites

SPECIFICATIONS PROVIDED BY ENVIRONMENTAL SERVICES

SCOPE OF SERVICES

The successful contractor will perform auditing services of the Nation’s Clean Air Program sites as per the locations identified in this Request for Proposal and as per the schedule provided.

The Cherokee Nation is requesting proposals for independent audits of their ambient air quality monitoring network as per the following locations and schedules. This is necessary to remain in compliance with EPA regulations which state that performance evaluations should be conducted by a trained experienced technician other than the routine site operator at least once per year (40 CFR pt.58, Appendix A, Section 3.1.2). Instruments associated with the CASTNet site (O₃ & MET₂) are audited by a contractor hired by Wood PLC and are not included in the scope of services.

It is preferred that the instruments at each site be audited according to the schedule below:

Site	Instruments Audited at Each Site Each Quarter			
	Cherokee Nation fiscal year 2024 begins on 1 October, 2023 Independent audits are conducted in the third month of each quarter, as indicated, and are coordinated with CNEP staff.			
	First Quarter December, 2023	Second Quarter March, 2024	Third Quarter <i>No audits scheduled</i>	Fourth Quarter September, 2024

located in Ada, OK)				
------------------------	--	--	--	--

MET₁ The Pryor site has wind speed, wind direction, temperature, relative humidity, and precipitation instruments, which will be audited in the quarter indicated.

MET₂ Meteorological instruments at the Stilwell (CASTNet) site are audited once each year by a contractor hired by Wood PLC.

MET₃ The Roland site and the mobile monitor have wind speed, wind direction, temperature, and relative humidity instruments, which will be audited during the quarter indicated.

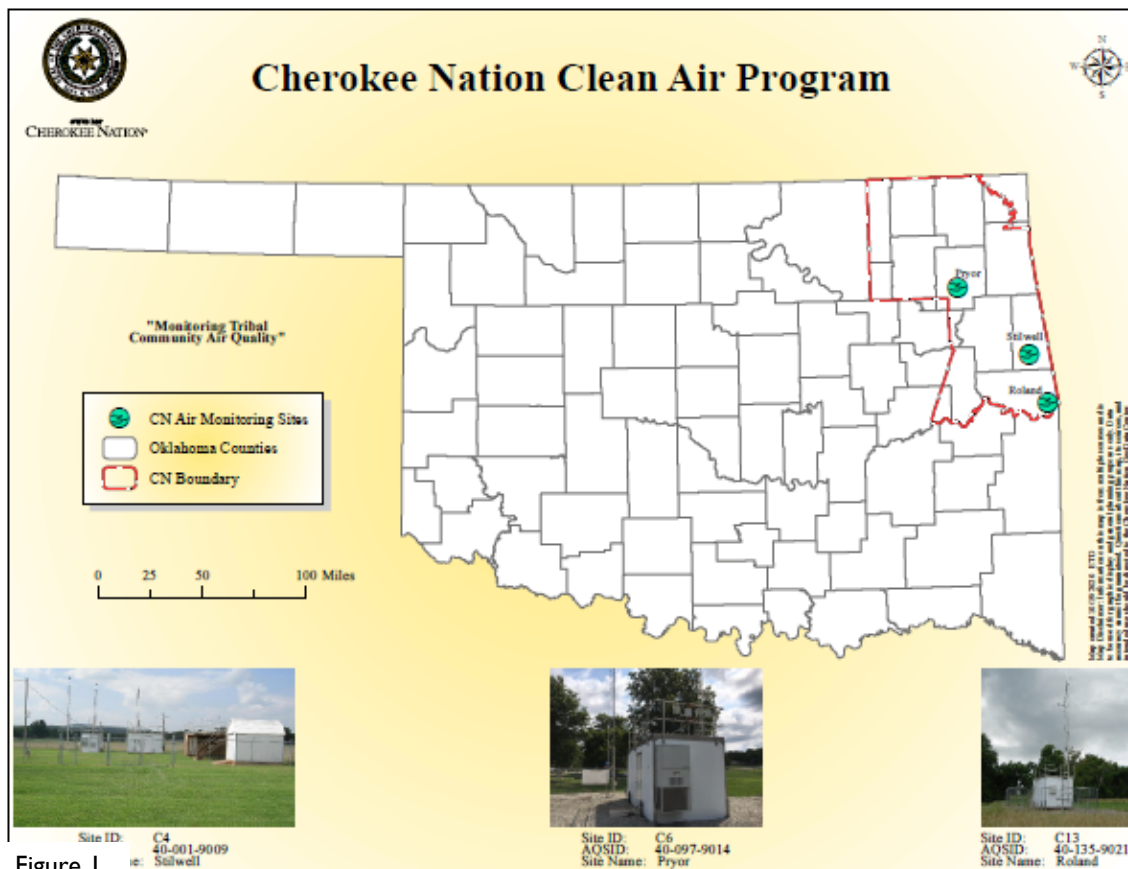

Figure 1

Figure 1

The map in Figure 1 shows the locations of the Cherokee Nation air monitoring sites, with the exception of the mobile monitor. A full audit of all parameters will be conducted at each site at least once per year. Non-criteria pollutant gaseous analyzers and meteorological instruments are audited once per year at each site; continuous PM_{2.5} and PM₁₀ instruments, criteria pollutant gaseous analyzers and NCore instruments are audited every six months. Audits should be conducted at the end of each quarter or arranged with CNEP staff. The Cherokee Nation fiscal year begins October 1.

The mobile monitor is currently located in Ada, OK and will remain at that location until August 2023. The location after that time depends on the needs of tribes in Region 6; the mobile could be moved to any tribe within Oklahoma, Texas or New Mexico. The potential site change should be considered when calculating travel costs; because this is not a regulatory site, audit schedules for the mobile are negotiable.

Gaseous pollutant concentration standards used to obtain test concentrations for carbon monoxide (CO), sulfur dioxide (SO₂), nitrogen oxide (NO), and nitrogen dioxide (NO₂) must be traceable to either a National Institute of Standards and Technology (NIST) Traceable Reference Material (NTRM) or a NIST-certified Gas Manufacturer's Internal Standard (GMIS). Test concentrations for ozone (O₃) must be obtained by means of a certified NIST-traceable O₃ transfer standard. Flow rate measurements must be made by a flow measuring instrument that is NIST-traceable to an authoritative volume or other applicable standard. These gaseous and flow rate audit standards are outlined in 40 CFR, pt. 58, Appendix A, Section 2.6. It should be noted that all gas analyzers must be audited through the top of the manifold in order to test the entire sampling system.

A detailed list of the monitors in use at each site has been provided in Figure 2. The evaluations are made by challenging the monitor with audit gas standards of known concentration from at least three audit levels. One point must be within two to three times the method detection limit of the instruments within the PQAOs network, the second point will be less than or equal to the 99th percentile of the data at the site or the network of sites in the PQAo or the next highest audit concentration level. The third point can be around the primary NAAQS or the highest 3-year concentration at the site or the network of sites in the PQAo. This information will be provided to the auditor; the concentration ranges can be found at 40 CFT, pt. 58, Appendix A, Section 3.1.2.1.

The meteorological towers at all sites can be unbolted at the base and lowered; they do not need to be climbed. All of the towers are equipped with pulley systems and can be lowered by one person.

All expenses should be included in quoted price. Cherokee Nation requires a detailed audit performance report within 30 days of the audit; reports in digital format are acceptable.
