Questions & Answers 1

Is this just a lift and shift based migration?? Please share if you've any additional details of this RFP.

This will not be a lift and shift. This will be a right size and migrate.

Requesting you to clarify on below items:

1. How to migrate to the cloud? Is it the lift and shift method? **Right size and migrate.**
2. Please share the following information if you use the lift and shift method.
    a. What is the current operating system? **Windows Server 2021-2022, Linux Ubuntu 12.04**
    b. What speed is your internet connection? **150 MB**
    c. If we move the total application, who will take care of the inside application configurations (there might be possible environment variable issues)? **HACN and Vendor**
    d. Is there any UAT and production environment? If so, how much downtime is provided for production migration? **Production migration will be done on the evenings or weekends to minimize downtime. We would prefer zero downtime. We are a 8-5, M-F facility.**
